Tamim Rahman

Systems Design Engineer 2 @ AMD

North York, Ontario, Canada

Experience

AMD

Systems Design Engineer 2

May 2024 - Present (2 years 1 month)

Markham, Ontario, Canada

AMD

Validation Engineer

May 2022 - August 2023 (1 year 4 months)

- Led the development of automation scripts for the DCGPU virtualization validation team. Added coverage for new test cases and migrating old bash scripts to Python automation frameworks.
- Leveraged the functionalities of internal frameworks and Ansible to achieve end-to-end automation for virtualization test content. Including full system setup with OS/driver install, host configurations, and virtual machine setup.
- Earned the quarterly spotlight award for my outstanding impact on the state of automation for virtualization validation.

Cybersecurity Research Lab (CRL)

Research Assistant - Developer Intern

September 2020 - August 2021 (1 year)

Toronto, Ontario, Canada

- Developed a web interface for the rendered display data using ReactJS and ExpressJS.
- Designed and implemented endpoints to have controlled access to create, read, update data elements.
- Built an intuitive visual editor for blockchain workflows.
- Proposed and spearheaded the addition of DevOps tools to the visual editor project. This included implementing CI/CD pipelines.

Toronto Metropolitan University

Research Assistant - Embedded Cryptography

May 2020 - August 2020 (4 months)

Toronto, Ontario, Canada

- Collaborating with a team of developers under the supervision of Dr. Jake Doliskani.
- Developed an implementation of post-quantum cryptography (SIKE) using Rust.
- Developed the local bignum library that is optimized for 8-bit AVR microcontrollers.

Education

Toronto Metropolitan University

Bachelor of Engineering - BEng, Computer Engineering · (2019 - 2024)
